Project element	Value	Pts earned	Comments
Successfully fork a GitHub repository and create a new RStudio project from fork <ul style="list-style-type: none"> <li>Project called “Lastname-Trick-or-Treat”</li> </ul>	3	2.5	You did not name the project according to the instructions
Set up project and workspace, pull in and examine data, fix mistakes Lastname-PS2.qmd <ul style="list-style-type: none"> <li>Use at least 2 functions</li> <li>Assign data types</li> <li>Fix errors (factors, plots)</li> </ul>	3	2.5	You did not do any error checking on the numeric variables.
Manipulate data and use it to correctly create Figure 1	3	3	good - but notice that in my figure, the factor levels are capitalized. Small detail to catch.
Manipulate data and use it to correctly create figure 2	3	3	good
Create a correct summary data table that opens in a new view <ul style="list-style-type: none"> <li>Sugar high, mean age, sd age, mean g candy, sd g candy</li> </ul>	3	3	good
Manipulate data and use it to correctly create Figure 3	3	3	good
Thought processes are well documented outside of code blocks	3	2	See notes in the project - I'd like you to have more commentary after you run a code chunk telling what's important about the result.
Successfully open a pull request to add your changes to the forked repository <ul style="list-style-type: none"> <li>Commit changes</li> <li>Open PR</li> <li>Link pasted in Canvas</li> </ul>	2	2	good
Code represents material we have covered in GSWR Chs 2 - 4 and not elsewhere	2	2	good
